Subject: Application for Machine Learning Engineer Position at ANTT Robotics.

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the AI Engineer position at ANTT Robotics, as advertised. With a solid academic background in Computer Science and a portfolio of projects demonstrating proficiency in object detection, classification, and the utilization of frameworks like PyTorch, YOLO and TensorFlow, I am eager to contribute to your esteemed team.

Having recently come across your job posting, I was particularly drawn to the opportunity due to its alignment with my skills and interests. My academic pursuits have equipped me with a strong foundation in machine learning and artificial intelligence, and my practical experience through various projects has honed my abilities in applying these concepts to real-world problems.

In my attached CV, you will find a comprehensive overview of my projects, showcasing my practical experience in AI technologies. These projects encompass various aspects of AI, including object detection, image classification, and natural language processing, and have provided me with invaluable hands-on experience.

Moreover, being located near Badda, I can assure you of my prompt and reliable attendance at the ANTT Robotics HQ. This proximity underscores my commitment to the role and the team.

While my professional journey may not yet include industry-specific roles, my commitment to continuous learning and my dedication to mastering AI concepts have prepared me to seamlessly integrate into your team.

Thank you for considering my application. I am available for an interview at your earliest convenience and am excited about the possibility of joining your team. I can start immediately upon selection.

Warm regards,

Md. Khurshid Jahan
